ALOVÉA AE:

In 2005, it was discovered that only specifically-sized fractions of Acemannan (Aloe vera's bioactive molecule) were small enough to be absorbed directly into the blood stream, and other slightly larger fractions actually facilitated the plant's amazing immunomodulatory ("immune balancing") effect. Immün contains a proprietary concentration of these immune balancing Acemannan fractions, offering powerful integrative health support. Each of the products in our Sports and Energy Reboot contains this proprietary Alovéa AE (Acemannan Extract) formulation.

Betalains, a natural compound found in some brightly-colored fruits and vegetables, is sometimes called "nature's anti-inflammatory." The active ingredient in Limitless contains the highest concentration of betalains from beet root extract available with zero sugar, due to a patent-pending chemical-free extraction process. In a study, this formulation was found to reduce inflammatory markers up to 48%. To read the Betalain Study and view all research related to proprietary ingredients in our products, visit:
